

Organic Space Age

South african producer/flutist Pearce van der Merwe (aka **Floating Grooves**) and british/swiss multiinstrumentalist Daniel Symons (aka **Dymons**) both members of “**The Peaking Goddess Collective**” got together to create this long awaited album.

“**Cosmosophy - Organic Space Age**” is a melting pot of many influences. Coming from different yet similar musical horizons Pearce and Dan have brought together their knowledge as **instrumentalists** as much as **electronic sonic wizards** to make a new kind of electro/acoustic music.

Fat **driving basslines**, **tribal** and **groovy** beats, **floating** scapes, **dreamy** melodies and **mysterious** sounds and are the ingredients to this **feast for the soul**.

It also features **Eulogio “Mambi” Arguelles-Puey**, Cuban master of the congas and batas, **Yann Shirardin** with deep feeling on guitars and **Eliot Short** fiddling on the viola, the violin and mandolins.

With musical inspiration from all over the world and the ages a new journey is born...

A touch of funk, of the 70's, breakbeats, ethnic, world fusion, dub, afro-beat, electronica, psychedelic and progressive trance... the combination of all these elements makes for a very **eclectic** and even **avantgarde** album some say... Very **groovy** and **flowing**, subtly **shifting atmospheres**, down to earth **dancing pulses** and yet **flying high** like **divine ecstatic dream states**... **Psychedelic Grooves** shall we call it?

The lot is wrapped in a beautiful piece of original artwork by visionary artist **Luke Brown**.

Mixed by Daniel Symons at Alchemy Studios, Switzerland

Mastered by Jake Perrine at RFI/CD in Seattle, WA

Cover design by Daniel Symons

Artwork by Luke Brown
